   A) flesh   B) skin   C) core   D) stem
3. Which apple variety is grown in California? ___________
   A) Fuji   B) Gala   C) Red Delicious   D) all three

Reasons to Eat Apples
Apples are a source of fiber. Fiber helps you feel full, helps move food through your body, and helps keep your blood sugar level normal. It is found only in plant foods like fruits, vegetables, grains, nuts, and seeds. Eating fruits, like apples, will help you get the nutrients you need to grow healthy and strong.

Fiber Champions*:
Beans, blackberries, dates, peas, pears, pumpkin, raspberries, whole wheat cereal, and whole wheat bread.
*Fiber Champions are a good or excellent source of fiber.

How Much Do I Need?
A ½ cup of sliced apples is about one cupped handful. This is about the size of half of a small apple. The amount of fruits and vegetables that is right for you depends on your age, if you are a boy or a girl, and how active you are every day. All forms of fruits and vegetables count towards your daily amounts – fresh, frozen, canned, dried, and 100% juice. Make a plan to eat plenty of fruits and vegetables every day. And don’t forget to be active for at least 60 minutes each day!
