Reasons to Eat Tomatoes
Eating a ½ cup of sliced tomatoes is a good way to get vitamin C and vitamin A. Tomatoes are also a great source of lycopene. Lycopene can help keep your heart and immune system healthy. Your body cannot make lycopene so you need to get it from most red fruits and vegetables.

Lycopene Champions*:
Pink grapefruit, salsa, spaghetti sauce, tomatoes, and watermelon.
*Lycopene Champions are a good or excellent source of lycopene.

How Much Do I Need?
A ½ cup of sliced tomatoes is about one small tomato. This is about the same as one cupped handful. The amount of fruits and vegetables that is right for you depends on your age, if you are a boy or a girl, and how active you are every day. Look at the chart below to find out how much you need to eat every day. Set a goal for how you plan to eat the amount that is right for you. Keep a journal to track how many fruits and vegetables you eat and how much physical activity you get every day. Remember: you should aim for 60 minutes of activity every day!

Recommended Daily Amount of Fruits and Vegetables**

<table>
