How Much Do I Need?
• A ½ cup of berries is about one cupped handful.
• A ½ cup of most berries (blueberries, strawberries, blackberries, raspberries) is a good source of vitamin C and fiber.
• Berries are rich in phytochemicals, which come from plants and may help you stay healthy.

The amount of fruits and vegetables you need depends on your age, gender, and physical activity level. All forms of fruits and vegetables count toward your daily needs – fresh, frozen, canned, dried, and 100% juice! Look at the chart below to find out how much your family needs.

What’s in Season?
In California, blackberries, blueberries, and raspberries are in peak season in late spring and summer. Frozen berries are available year round. Visit a local farmers’ market to ask about the berry season in your area.

Try these other rich sources of phytochemicals: beets, cherries, plums, red or purple cabbage, red or purple grapes, and whole grains.

Let’s Get Physical!
Biking is a great way to be active and healthy. It also helps the environment by lowering air pollution and traffic.
• At home: Ride your bike for errands.
• At work: Invite coworkers to ride bikes during Bike-to-Work in May.
• With the family: Ride to a park after dinner to play a game of tag.
