Circle all beans on the menu.

- How many did you circle?
- What is your favorite bean variety?
- What is your favorite recipe with beans?
Reach Your Goals!

Use this chart to set goals and track how many cups of fruits and vegetables you eat and how active you are. Physical activity is a game, sport, exercise, or other action that involves moving your body, especially if it makes your heart beat faster. Check how you did at the end of the day and set a goal for tomorrow. (Hint: Make copies of the chart and track your progress for one week!)

Reasons to Eat Beans

A ½ cup of most cooked beans has lots of fiber and folate. Eating beans is also a good way to get protein, iron, and potassium. Protein is the part of the food that we eat that makes the bones, muscles, hair, and skin in our bodies.

Plant Protein Champions:* Beans (dried and cooked), nuts, peanut butter, peas, sunflower seeds, and soybeans (as edamame or tofu).

*Plant Protein Champions are a good or excellent source of protein.

How Much Do I Need?

A ½ cup of cooked beans is about one cupped handful. The amount of fruits and vegetables that is right for you depends on your age, if you are a boy or a girl, and how active you are every day. Beans come in lots of shapes, sizes, and colors, like garbanzo (chickpeas), blackeye peas (cowpeas), kidney, lima, navy, black, and pinto beans. Remember to eat a variety of colorful fruits and vegetables throughout the day – fresh, frozen, canned, and dried. And, reach your goal of at least 60 minutes of physical activity every day!

Recommended Daily Amounts of Fruits and Vegetables*
